

Tiana Lemons, NCIDQ, EDAC OleeVue Designer of the Month

Gould Turner Group's award winning Director of Interior Design for the past 18 years, **Tiana N. Lemons, NCIDQ, EDAC**, hails from the great state of Illinois where she grew up in the Peoria, Illinois area. In 1989 she received her Bachelor of Science in Interior Design from Oklahoma State University. Her work has been featured in numerous publications but her greatest measuring stick of success are her long term trusted relationships with key clients such as Hospital Corporation of America, Regional Care Hospital Partners, Tennessee Board of Regents, and Metro Nashville Schools just to name a few. Ms. Lemons combines the key skills of directing budget focus projects that utilize sustainable materials to maximize the clients' investment, while creating beautiful designs that deliver the wow factor to new or renovated facilities. Her industry leadership is also recognized among her peers as she currently sits on the State of Tennessee's International Interior Design Association Chapter as President.

“Olee is such a creative group to work with. Their products and design team help to ensure our designs are done in the most efficient and economical way possible. Once we create our designs, I give them a call and we work out the details and look at different ways to bring the best product to our clients. Due to this collaborative nature, we have used their products in a different way on almost every project I have worked on over the last 5 years.”

Tiana Lemons, NCIDQ, IIDA, EDAC
Director of Interior Design
GOULD TURNER GROUP, INC.
Nashville, TN 37205

OleeVue Monotone Pattern "Wave 403"

Tiana chose the OV "Wave" pattern to add energy and beauty at Canyon Vista Medical Center. OleeVue frost film in both decorative and privacy versions was used in a variety of locations throughout the hospital in Sierra Vista, Arizona.

OleeVue Monotone Pattern "Twirl 404"

Olee Creative worked with Tiana and her GTG team to provide these stunning decorative panels at Kingwood Medical Center. Tiana selected

OleeVue's pre-designed pattern "Twirl", which was printed onto 1/4" acrylic. The panels were then cut to shape and installed into the custom designed labor & delivery suites.

We'd love to share your story and work with you on your next project. You could be our next Designer of the Month!
